CTI1 (EXW) [REDACTED]

12 August 2010

OVERALL CLASSIFICATION: TOP SECRET//COMINT//REL TO USA, AUS, CAN, GBR //MR

UNCLASSIFIED//FOUO

RT-RG Implementation

- RT-RG installed 5 March
- Authorization to proceed operationally (to ingest and store data) granted on 12 April
- Mexican drug trafficking mission drove development and priority of data sources
- IOC 15 June with FOC scheduled for 31 December
- Data being ingested from:
 - BIRDBATH / BIRDHOUSE / Mexico City / Guatemala City / TAO / KLIEGHLIGHTS / RIVET JOINT / NSA Colorado's data sources
- Formal RT-RG training remains a challenge
- Anticipating substantial operational benefit for Mexican Cartel HVT and Border Security missions

SATD RT-RG Implementation

- Utilized GSM selectors of interest to develop pattern of life and operating areas on SATD targets, notably three Vicente Carrillo Fuentes Organization (VCFO) hit squad members since May 2010
 - Law Enforcement captured two of the individuals thus far and are there is an imminent operation pending to capture the third (BA member [REDACTED]).
- Issued one IGRAM report on VCFO thus far, two more in development
 - Anticipate significant increase in IGRAM reporting due to RT-RG capability
- 13 of 28 SATD personnel have attended RT-RG training, remainder are/will be scheduled for training.

PSO RT-RG Efforts

- Utilized selector associated with SIA smuggler Chuy in Reynosa for geo-locational purposes which successfully revealed recent tower activity a/w his cell phone
- Currently attempting to use RT-RG for maritime mission Iridium satellite phone traffic collected via HARBORVIEW
- 6 PSO analysts have attended RT-RG training to date
